

Venus Yantra

Venus is the planet that represents love, beauty, prosperity, peace and harmonious communication in relationships. Astrologically, Venus oversees artistic talents, dance, music, and all aspects of pleasure and enjoyment in material life.

The calming shades of blue in this Venus Yantra create a peaceful atmosphere and encourage self expression, related to the throat chakra. The ability to give and take in partnerships, to be playful, affectionate and warm hearted all relate to the feminine principle of this planet.

Within the shining rays that emanate from Venus, two concentric circles represent unison, harmony with others, and positive exchange in relating to individuals. The joining circle represents the masculine energy of protection and support and the inverted triangle is the feminine energy at the core, thus defining the balance of male and female.

This Venus Yantra is lovingly created with energetic principles, including mantra sound vibration and the infusion of vibrational flower essences. The flower essences work energetically to enhance the atmosphere of peace, harmony and good will in the space where it is placed. This yantra can feature in any environment to encourage open and loving communication between people and to bring peace and calm into your room.
